

# FROM SLOVAKIA

We are starting our project

At the beginning we bought an **interactive white board** – a necessary information and communication tool - to meet project tasks **well**. We use it to communicate with our project partners, to learn about the stories of the Mole, draw, paint, learn english words,...

## Autumn

Every day we live with our friend Mole. We spent some beautiful moments in nature where we collected forest fruits, talked about nature... With our parents we created interesting nature crafts....

...we are collecting chestnuts

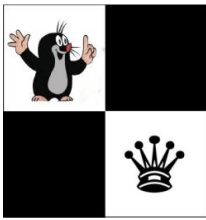

we are raking leaves...

...our nature crafts

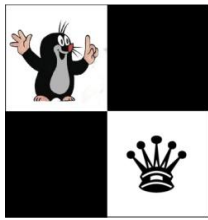

are learning about the world of the chess .....

....we bought new chessboards

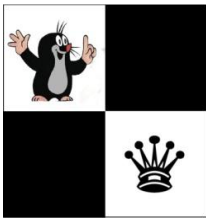

Winter with the Mole....

We took part on an activity called „St. Nicholas in Mošovce”, where we recited nursery rhymes, sang songs, danced, created the Mole from the snow, fed birds....

Mole is with us when we visit theatre performances, when we paint, dance, count, ....it is a **part of us** and our nursery....

- We continue in creating our web page where you will find all project activities from our nursery as well as from partner nurseries
- We are preparing for a visit of Czech children in our nursery (we are working on a program)
- We are preparing a meeting of all project partners in Slovakia, which will be held in October 2013
